DR. PRICE'S Cream Baking Powder

Has a dietetic value greatly beyond the conception of any one who has not used it. It will make your food of a delicious taste, a moist and keeping quality and a digestibility not to be obtained from any other baking powder or leavening agent.

But more important than all else, Dr. Price's Baking Powder carries only healthful qualities to the food.

As every housekeeper can understand, burnt alum and sulphuric acid—the ingredients of all alum and alum-phosphate powders—must carry to the food acids injurious to health.

Avoid the alum powders—study the label
